BYLIGHT

Lighting The Path

The Future in
CLOUD SERVICES

By Light partners with Amazon Web Services (AWS) and Microsoft Azure to host Government applications and infrastructure. Our clients receive high availability, security, and performance in a cost-effective model that reduces overhead and capital expenditures.

Cloud Experience

By Light's access to a multitude of cloud providers and platforms guarantees the right solution is deployed for your needs. We complete an in-depth analysis of your business requirements to select the appropriate provider to meet your objectives and successfully complete the project.

CLOUD MANAGEMENT & MONITORING
Focuses on performance indicators like response time, latency, up-time, compliance auditing, and proven disaster recovery models for performance and cost reduction.

APPLICATION RATIONALIZATION
Managing business applications through Application Rationalization results in improved business operations.

DEVELOPMENT, QA & TESTING
Faster, more reliable access to integrated central services Team Foundation Server (TFS)/Visual Studio Team Services (VSTS), Quality Assurance, and testing software applications and development.

APPLICATION & INFRASTRUCTURE MIGRATION
Privacy, interoperability, data and application portability, data integrity, business continuity, and security ensure seamless and successful migrations.

CERTIFIED & EXPERIENCED STAFF
We are industry recognized cloud experts in AWS and Microsoft Azure.

BY LIGHT SERVICES

- Cyberspace Operations & Cybersecurity
- Information Assurance
- Integration Center
- Installation Services
- Federal Healthcare
- Modeling & Simulation
- Optical Networks
- Program Management
- Rapid Prototyping
- Satellite Communications
- Systems Design & Engineering Installation Services
- Training & Exercises
- Wireless Communications

RATINGS & CERTIFICATIONS

- CMMI-DEV L3
- ISO 9001:2015
- ISO/IEC 27001:2013
- ISO 20001:2008
