## Unmanned Aerial Vehicle (UAV) System Features

By Light's Unmanned Aerial Vehicle (UAV) Experience is a tool for military recruiters to convert prospects into leads by storing lead contact information if they are within the correct age range. Contact information is stored locally on each system and can be retrieved by recruiters.

While no player is on the system, attract videos are played. These videos were supplied by the Army National Guard and relate to the systems current-installed military occupational specialties.

The UAV Experience is based on MOS 15W. Our designed vehicle platform puts the player behind the camera lens of a MQ-1C Gray Eagle Unmanned Aerial Vehicle. Your mission is to protect the convoy, Stalker 2-1 from potential enemy damage while on your path to Home Base. You start on course around a mountainous terrain as enemy vehicles can be seen driving from cover. As an Army National Guard UAV camera and laser designator, you must drive protect the convoy by directing the target designator to identified threats. A brief tutorial will play to show the player what to look for in the terrain. The challenge is based on convoy health and points accumulation.

The player's score gets placed into the leaderboard. The leaderboard is displayed after each experience and induces competition between players.

The Unmanned Aerial Vehicle Experience includes the following features:

- Gameplay is for entertainment and awareness to the UAV military occupational specialty at recruiting events. The gameplay encourages the player to use their ingenuity and resourcefulness to prioritize target acquisition and threat severity.
- Lead Generator: Collects and stores contact information for prospects between the ages of 17 and 34.
- The system attracts and holds attention, giving recruiters greater opportunities to interact with prospects/leads.
- The UAV Experience promotes competition. Leaderboards for each experience are displayed between attract videos.

## Setup and Shutdown

Setting up and shutting down the system takes less than 3 minutes and requires no tools.

### Setup

To setup the system, follow this procedure:

1. Open the case.
  - a. With the system laying on the floor and the "This side up" labels in the correct orientation, unlatch all the case latches.
  - b. Mount each case latch to the magnets to hold the latches in place.
  - c. Open the case and allow the top section to rest on the restraints.
2. Unfold the secure the stand
  - a. Grasp the orange lifting handle and raise the stand assembly to the upright position.

**RESTRICTED USE**  
**Access Limited to Authorized Personnel**

- b. While supporting the stand assembly, secure the latch on the left and the latch on the right.

*Make sure each latch is properly locked into position.*

### 3. Setup Monitor

- a. Loosen the locking knobs at the base of the monitor, rotate the touchscreen display to the upright position, and then tighten the locking knobs.

### 4. Install mid assembly (optional)

- a. Install the mid assembly to the cross support. Align the support hooks to the stand assembly crossbar. Push the hooks onto the crossbar to ensure it is secure.

### 5. Power up the system

- a. Plug in the power strip's cable into a power outlet and switch it on. After a few moments, the system will be ready to go.

## Shut down

To shut down the system, follow this procedure:

### 1. Power Down

- a. Turn off the computer by briefly pressing the power button on the computer. Allow Windows 10 to go through the shutdown process before proceeding.
- b. Turn off the switch on the power supply, unplug, and stow the cable.

### 2. Fold down monitor

- a. Loosen the knobs at the base of the monitor while holding the monitor in place.
- b. Carefully rotate the monitor back against the frame and tighten the knobs.

***Do not allow the monitor to rotate too quickly as this may cause damage.***

### 3. Fold down the stand

- a. Unlock the two latches on the left and the right

**RESTRICTED USE**  
**Access Limited to Authorized Personnel**

- b. While holding the orange handle, carefully lower the stand down into the case.

***Do not allow the stand to fold down quickly as this may cause damage.***

4. Close the case

***Make sure all accessories are stowed properly and everything is strapped into place.***

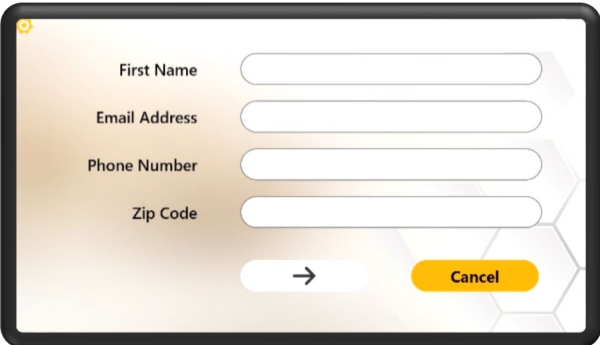

- a. Close the lid.  
b. Latch all case latches.

## Player Instructions

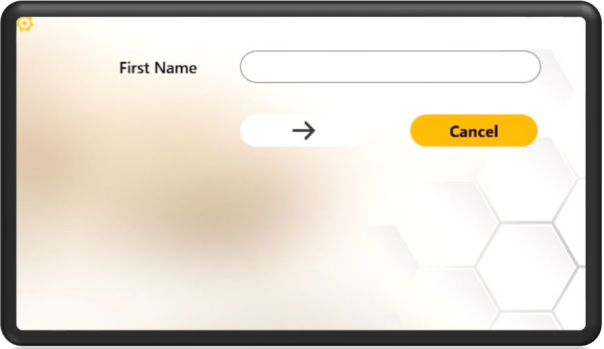

The following includes instructions on how a player uses the UAV experience from start to finish.

### Registration

Once a player touches the monitor, the application will enter registration mode.

	<p>The player then answers if they are within recruitment age of 17 to 34.</p> <p><i>If the Yes and No buttons are not registering properly, please try double tapping the buttons.</i></p>
	<p>If the player answered Yes to the previous question, they must then enter their contact information which includes First Name, Email Address, Phone Number, and Zip Code.</p> <p>Tap inside the text fields to open the virtual keyboard. Use the touch keyboard to enter contact information.</p> <p>The email address field must have "@" and "." characters to allow the user to proceed.</p> <p>Tap "Enter Arrow" to proceed to the experience.</p>

**RESTRICTED USE**  
**Access Limited to Authorized Personnel**

 <p>The screenshot shows a mobile application interface with a white background and a subtle hexagonal pattern. At the top left, there is a small orange circle with a white 'i' icon. Below it, the text 'First Name' is followed by a white text input field. To the right of the input field is a white button with a black right-pointing arrow, and further right is a yellow button with the text 'Cancel' in black.</p>	<p>If the player answered No to the previous question, they only need to enter their first name.</p> <p>Tap the text field to open the touch keyboard at the bottom.</p> <p>Tap "Enter Arrow" to proceed to the experience.</p>

## Gameplay

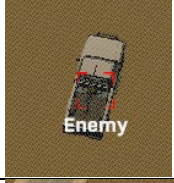

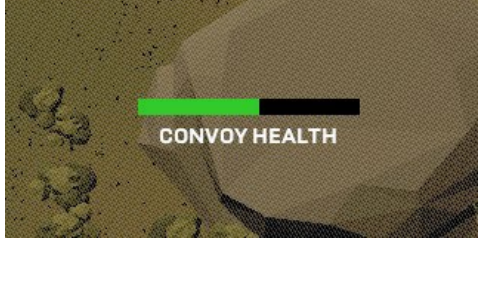

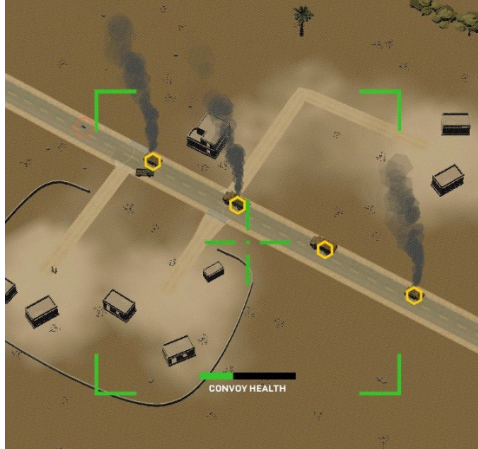

The main objective is to protect the convoy from enemy attack by using the onboard camera/laser designator to clear the path to Home Base.

**RESTRICTED USE**  
**Access Limited to Authorized Personnel**

**RESTRICTED USE**  
Access Limited to Authorized Personnel

<p>IED's will appear in the road in various locations</p>		
<p>Enemy convoy trucks will appear from random locations. They could come from a building, a patch of trees, or a mountain</p>		
<p>When pulling and holding the trigger you'll activate the laser. Be sure to <b>hold the target identifier over the target</b>. If you release the trigger early or move the identifier, the target could be lost</p>		
<p>EOD disarming robots are available to disarm IED's. A quick click with the trigger will deploy these helpful little robots</p>		
<p>Watch your Convoy Health closely. It can drop quickly if you get caught up in the action</p>		
<p>Your convoy is the mission. You want to help clear their path to the waypoint without losing health</p>

## Operator Instructions

### Configuration Menu

The configuration menu gives the operator several options. Please see below for more information.

To open the Configuration menu, perform the following procedure:

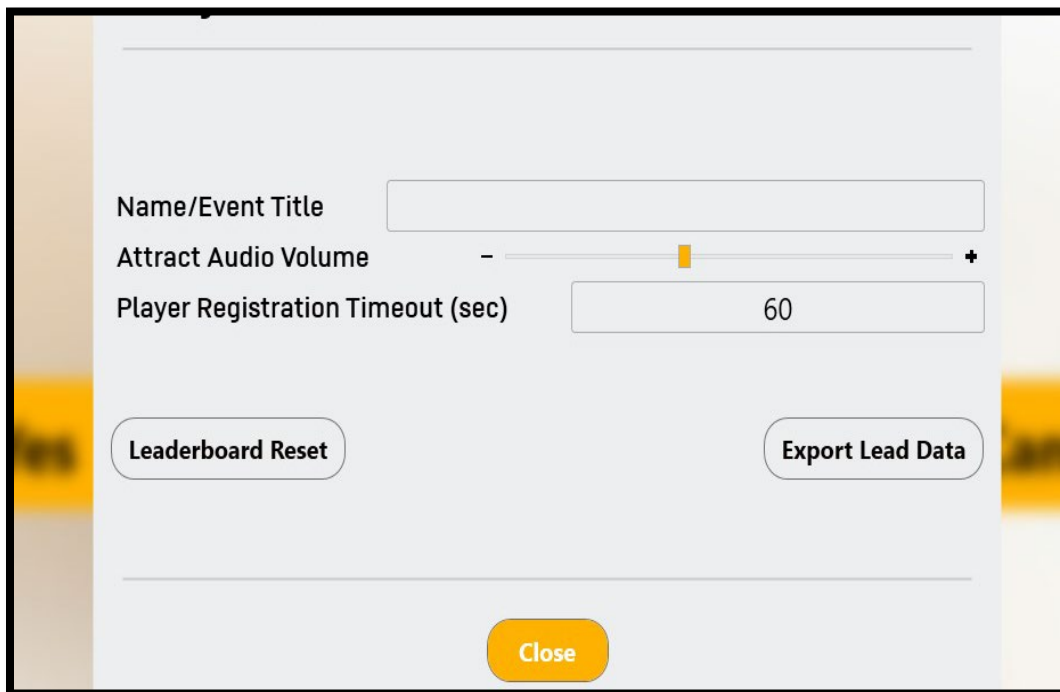

1. If not a touch screen model, plug a USB keyboard into the computer.
2. Touch screen. It should take you to the start of the User Registration.
3. While in the User Registration, press the cog icon in the top left corner.

**RESTRICTED USE**  
Access Limited to Authorized Personnel

4. This will open the Configurations menu.

- Username: admin
- Password: operator

5. Configuration settings can be set per operators' preferences.

6. Attract Video Volume will adjust the master volume of the Attract Videos.

**RESTRICTED USE**  
Access Limited to Authorized Personnel

7. Player Registration Timeout will be for the user registration entry screen. If the screen isn't interacted with, within that set time, it will revert to the Attract Screen.
8. Leaderboard Reset will reset Lead Data displayed between attract videos
  - Note: This does not delete the data file. It only clears the leaderboard that is displayed in attract mode. This feature may be useful for promoting competition. For example, if the leaderboard is cleared at the beginning of a school-based event, everyone on the leaderboard will be from the same school.
9. Export Lead Data will allow the operator to gain access to the Lead Generation Web Application/User Data

### Export Lead Data

Once the operator clicks the Export Lead Data button in the Configuration Menu, the following screen will pop-up.

RANK	NAME	SCORE
1	JHtst001	605
2	TST001	45
3	gfrs	0
3	gfd	0
3	TST1	0
3	TSTUA001	0
3	hf	0

For Cellular Devices:

1. Ensure wamp64 virtual server is operating on Kiosk (wamp icon in taskbar is green).
2. Connect your device (Android or iPhone) to Wi-Fi (PC Name).
3. Wifi username/password should be: admin/operator

**RESTRICTED USE**  
Access Limited to Authorized Personnel

- Once connected to the virtual server, use camera or QR Code reader to connect to <http://192.168.100.102> in Safari, Google Chrome, or applicable browser.
- Once the browser loads, login with username: admin password: operator

For Kiosk Web Browser:

- Ensure wamp64 virtual server is operating on Kiosk (wamp icon in taskbar is green).
- Open Microsoft Edge, Google Chrome, or Mozilla Firefox and enter <http://192.168.100.102> in the address bar.

Once the browser loads, login with:

- Username: admin
- Password: operator

### Web Exporter Application Data

- Each user experience will be recorded on the web server and will contain exact information pulled from recruit data files.
  - Please see [Accessing the Data](#) file for more information on data file retrieval.
- Clicking on the Phone or Email icons will provide operator with the users entered information. If the player was under the age of 17, no identifiable information other than name will be available.

### Adjust Audio volume of attract videos.

The Audio Volumes slider adjusts the volume of the attract videos, independent of the experience. This is useful if it is desired to increase or decrease the volume of attract vs. experience modes.

**RESTRICTED USE**  
Access Limited to Authorized Personnel

## Data File

All player registration data and experience scores are stored in a .CSV data file. The data file is updated after each player's experience.

The data file stores the following data per player:

- OperatorCustomValue – This is a string of characters input in the Configurations menu.
- FirstName – First name entered by the player
- EmailAddress – Email Address entered by the player
- RecrutableAge – True or False. True if player entered Yes for the 17 to 34 age question.
- PhoneNumber – Phone number entered by the player.
- Zip Code – Zip Code entered by the player.
- ExperienceName – Name of Experience. This is useful if combining the data file with other data files from different experiences.
  - ITS – Information Technology Specialist
  - ATC – Air Traffic Control
  - MTO – Motor Transport Operator
  - HCE – Horizontal Construction Engineer
  - CMS – Combat Medic Specialist
  - FF – Fire Fighter
  - UAV – Unmanned Aerial Vehicle Operator
- Score – Score received in experience.
- StartTime – Time the player started the experience.
- EndTime – Time the player finished the experience.

## Finding the Data File, within the PC

To find the data file, perform the following procedure:

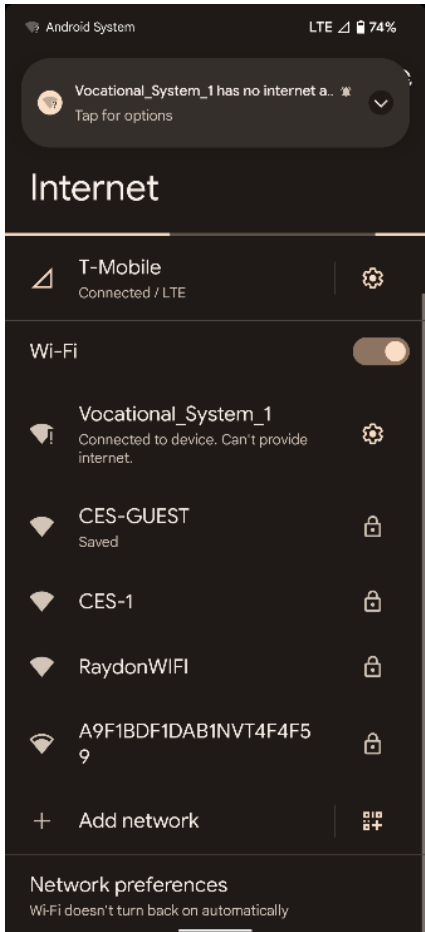

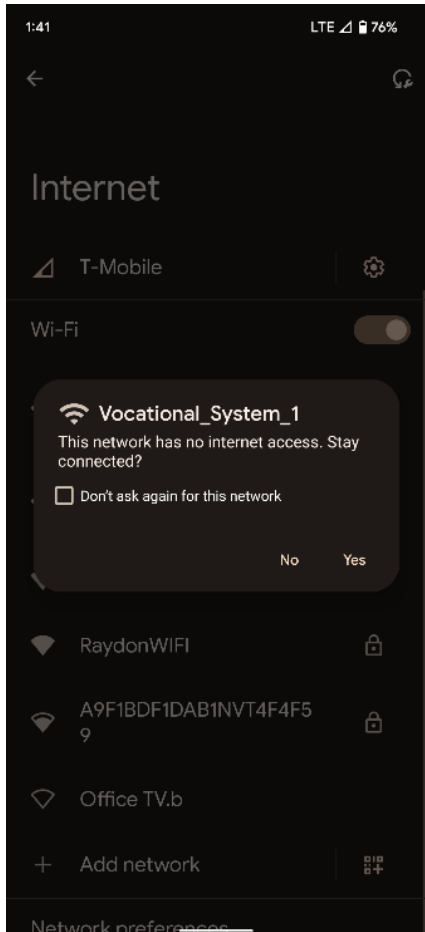

1. Plug in a USB keyboard into the computer.
1. If in Registration mode, please press the back button on the top left.
2. Press “**Escape**” in attract mode to exit the application back to the desktop.
3. Click on start > Microsoft Edge.
4. Type 192.168.100.102 in address bar.
5. A website page should autload with the login page.
  - Username: admin
  - Password: operator
6. When the page loads, the user registration data should be visible, shown just like the Web Exporter Web Application Data.
7. Click “Download” and you should receive a prompt to “Open, Save, or Cancel.”
8. Click “Save or Save as” to download the .CSV file.
9. The default save folder is This PC > Downloads.
10. The most recent file date should be the file saved (scoring-date). This is the CSV data file.

Please follow Department of Defense guidelines for copying the file to another computer. Alternatively, the data file can be opened on the system to be viewed/photographed.

## Troubleshooting

Please see the following table for troubleshooting steps.

Problem	Possible Solution(s)
Unclear/Staticky Audio	<ul style="list-style-type: none"> <li>Check the auxiliary connection on the back of the computer.</li> </ul>
No audio	<ul style="list-style-type: none"> <li>Increase soundbar volume.</li> <li>Check the power on the soundbar.</li> <li>Check that the AUX input is selected on the soundbar.</li> </ul>
Registration Buttons not working	<ul style="list-style-type: none"> <li>Double tap the registration button if a single tap does not progress to the next section.</li> </ul>
Touch Screen Buttons not working	<ul style="list-style-type: none"> <li>May require multiple taps if a single tap does not progress to the next section</li> </ul>
Not connecting to WIFI/Server	<ul style="list-style-type: none"> <li>Ensure Username and Passwords are correct</li> <li>Make sure Wamp64 server is running</li> <li>Ensure Raydon user is logged in as Windows user</li> </ul>
Depending on Cell Device, when wirelessly connecting to the VR system, additional steps may be required	<ul style="list-style-type: none"> <li>Google Pixel 6 requires a notification prior to connecting to web server. Wait for notification and select yes. You <i>must</i> receive a notification to access the web server</li> </ul> <div style="display: flex; justify-content: space-around;">   </div>
