

**FOR IMMEDIATE RELEASE**

**BY LIGHT AWARDED PRIME CONTRACT UNDER CUSTOM SATCOM SOLUTIONS-SMALL BUSINESS (CS2-SB) FOR THE U.S. GENERAL SERVICES ADMINISTRATION**

*By Light Selected to Provide Satellite Communications Solutions under a \$900 Million Program Ceiling Contract*

ARLINGTON, VA, March 26, 2012 — [By Light Professional IT Services, Inc.](#) (By Light) a leader in end-to-end commercial satellite communications solutions for the Department of Defense, and civilian agencies, today announced it has been awarded a U.S. General Services Administration (GSA) contract under the Custom SATCOM Solutions – Small Business (CS2-SB) program. CS2-SB, a \$900 million, five-year multiple award, IDIQ contract, provides satellite engineering and integration services, and customized communications solutions (COMSATCOM) to U.S. government agencies.

“By Light has been providing customized satellite communications solutions and services to our customers since we were founded more than eight years ago. We’re pleased to be an awardee and look forward to working with the Defense Information Systems Agency (DISA) and GSA to offer these solutions to a wider audience,” said Lt. Gen. (Ret) Bob Donahue, CEO of By Light.

CS2-SB can be used by any federal agency, as stipulated in GSA Order ADM 4800.2G, to acquire COMSATCOM services in any theatre around the world. Its scope includes global end-to-end solutions with any combination of fixed satellite service, mobile satellite service and/or service-enabling components such as terminals, teleport, and terrestrial backhaul. It can also be used to provide a variety of professional services including architecture, design, testing, engineering services, and operations and maintenance (O&M).

“We have assembled a world-class team of space segment providers, engineering professionals, field service representatives, and managed service solutions providers. By Light is excited for the opportunity to cost-effectively leverage our team’s expertise and capabilities in support of CS2-SB customers and their end-to-end SATCOM needs,” said Jeff Adelman, By Light’s CS2 Program Manager.

By Light offers support for the entire range of services in the CS2-SB portfolio including interactive services such as real-time two-way interactive networks, voice, data, video and sensor networks, distance learning, and telemedicine, as well as continuity of operations (COOP) solutions, broadcast networks, emergency responder operations, and special operations.

“Combining the scope of the CS2-SB program with the capabilities of By Light and our team allows access to virtually any SATCOM solution, large or small, anywhere in the world. One MHz to a full transponder, one terminal or a hundred, we have the experience, the talent and the Team to deliver the right solution on-time and on-budget,” said Keith Bodiford, By Light’s Senior Solutions Architect.
