

FOR IMMEDIATE RELEASE

BY LIGHT AWARDED HIGHLY ADAPTIVE CYBERSECURITY SERVICES (HACS) SPECIAL ITEM NUMBERS (SINs)

Expanding GSA Schedule Access to Proven Cyber Professionals

ARLINGTON, VA, October 30, 2018 — By Light Professional IT Services LLC (By Light) has been awarded three of the Highly Adaptive Cybersecurity Services (HACS) Special Item Numbers (SINs) by the General Services Administration (GSA). This award expands By Light’s existing GSA Schedule (GS-35F-0308U) service offerings into the cybersecurity arena in support of the Cybersecurity National Action Plan (CNAP) and the Cybersecurity Implementation Plan (CSIP). These HACS SINs allow By Light’s customers direct and cost-effective access to proven experience delivering high quality cybersecurity support services that rapidly address potential vulnerabilities and stop cyber adversaries.

“Direct access to proven cyber professionals addresses an urgent need faced by many of our customers in the DoD, the Intelligence Community and Federal Agencies,” said Robert Donahue, CEO of By Light. “These SINs provide an opportunity for timely, enterprise wide cyber assessments and the critical remediation services that result in long term network and data security.”

By Light was awarded the following SINs:

Penetration Testing (SIN # 132-45A) – Security testing in which assessors mimic real-world attacks to identify methods for circumventing the security features of an application, system, or network.

Incident Response (SIN # 132-45B) – Helps organizations impacted by a cybersecurity compromise determine the extent of the incident, remove the adversary from their systems, and restore their networks to a more secure state.

Risk and Vulnerability (SIN # 132-45D) – Conducts assessments of threats and vulnerabilities; determines deviations from acceptable configurations, enterprise, or local policy; assesses the level of risk; and develops and/or recommends appropriate mitigation countermeasures.

By Light delivers proven cybersecurity expertise at all classification levels and provides actionable, repeatable and sustainable processes and tools that seamlessly integrate with customers’ day-to-day operations to ensure mission effectiveness.
